What's Magento 2 Auto Invoice For Free Orders

What's Magento 2 Auto Invoice For Free Order Magenuts Magento 2 Auto Invoice For Free Order Extension helps Magento 2 admin to generate invoices automatically. Features 1. Fully automate the invoices creating process with Magento 2 Auto Invoice extension. The module will instantly create the invoice as soon as an order is created.

Important Notes and Requirements

1. Requirements: **Magento Community 2.1.x up-to 2.3.4, Magento Enterprises (2.1.x to latest).**
2. Server Side Requirements: *MySQL 5.0 and above PHP 7.1.6 and above.*
3. All functionality is fully tested on Magento Community Edition 2.2.2 and will be compatible with Editions from 2.1.x up to 2.3.4.
4. **Magento Enterprises Edition is also supported but not tested.**
5. **For your safety related to any damage or loss to your store, its strongly recommended to you that take backup first.**

Installation

1. Unpack the extension ZIP file on your computer.
2. Connect to your website source folder with FTP/SFTP/SSH client and **upload all** the files and folders from the extension package to the corresponding **root folder** of your Magento 2.x installation:

Please use the “**Merge**” upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most of FTP/SFTP clients software. For MacOS it's recommended to use Transmit. If you install several extensions from Amasty, they will contain same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

3. Connect to your Magento directory with SSH.
4. Run the following 3 commands:
 - a. `php bin/magento setup:upgrade`
 - b. `php bin/magento setup:static-content:deploy`
 - c. `php bin/magento setup:di:compile`

Auto Invoice Enable / Disable Configurations

At any time you can enable and disable this extension in the system configuration. You can do this by opening the backend menu Stores > Configuration. There you will find the entry Magenuts Extensions > Auto Invoice. After clicking on it you see a dropdown box where you can enable/disable the module. Save the configuration and delete the cache.
